

EasySIGN 5 Print products	Print Server-Pro	Print Server-Master
<b>Technology</b>		
Optimized for multiprocessor and Intel HT technology		
Customisable file management for scalability		
Adobe Postscript Level 3 compatible		
Quality control over Postscript rendering		
PDF level 1.4 compatible		
Support for light ink inksets.		
Support for all 6 color inksets like CMYKOG, CMYKRB etc.		
Variable dot support with user defined drop size usage		
<b>User interface</b>		
Logbook		
Internet enabled logbook		
Adjustable number of simultaneous filters, jobs and prints	1	5
Navigation tree for easy acces to complex settings		
Fully customisable user interface		
Zoom in on jobs and prints		
Administrator mode for easy setup		
<b>Processing</b>		
Superb printing speed		
On-the-fly printing for the fastest time to print		
Unlimited number of Hotfolders, with fully customisable settings		
Unlimited number of settings per device		
Multiple devices can be installed and printed to simultaneously	1	5
User controllable worker threads		
<b>Design station</b>		
Receive jobs from local computer		
Receive job from PC or Apple via network		
Automatic file format recognition		
Support for multipage files		
Print from any application using Postscript printer driver		
Print & cut		
Print & cut on separate devices		
<b>Color management</b>		
Create monitor profiles for better softproofing results		
Create scanner profiles using the supplied scanner target		
Unique visual linearisation, without the use of instruments		
Use densitometer instruments for linearisation		
ICC profile creation by desktop scanner, including itc target		
Input profiles can be selected for all possible situations		
CMYK colors can be unmanaged and unlinearised		
Dirty cyan, yellow, magenta suppression		
Spot color list to manage named colors		
Embedded/linked ICC support		
Full control over ink limit settings		
Color filters for finetuning of color rendering		
Contains standard ICC profiles		
Contains many predefined ICC profiles		
Support for 3rd party ICC profiles		
<b>Diffusions</b>		
Error diffusion		
Stochastic diffusion (improved)		
User defined raster		
Pattern, coarse and fine		

EasySIGN 5 Print products	Print Server-Pro	Print Server-Master
<b>Job Control</b>		
Job previewing		
On screen color proofing		
Hold for operator' settings		
Number of copies/copy spacing		
Filter and render information		
Scale to size, horizontal or vertical		
Scale to percentage, horizontal or vertical		
Non-proportional scaling		
Rotating in 90 degree steps		
Mirror		
Automatic tiling		
Manual tiling		
On screen tiling		
Positive or negative tiling overlap		
Enabling or disabling of individual tiles		
Print extra information		
Automatic cropmarks		
Input profile selection for CMYK/RGB/Grayscale, Bitmap/vector		
Rendering intent selection for bitmap/vector		
Disabling of color management for CMYK vector/bitmap		
Print as Grayscale only		
Optional embedded profile usage		
Full color correction per individual job		
Brightness, saturation and contrast settings per individual job		
Job priority control		
Job archiving and automatic clearing		
<b>Print control</b>		
Print preview		
Print soft proofing and preflight		
Nesting of print jobs for material saving		
Nesting of individual jobs		
Manual nesting/positioning of jobs		
Multi-page nesting		
Start print manually		
Start print at specific date/time		
Start print on rendered length		
Start print on efficiency		
Confidence strip printing		
<b>Ports</b>		
Output to local port (LPT/serial)		
Output to Windows printer		
TCP/IP network printing		
Output to FILE		
Output to network share		
USB port		
<b>Drivers</b>		
All current sign printer models supported, see driver list for availability		

Grey means that the feature is included  
 Optional Design  
 Optional ezColor
